Got free key for game and trading cards so i do not know i do not play vr.. You can't play this game without Vive.. Charming and relaxing game, I can make friends with all the animals on the island! :). Do not buy this game, I repeat do not purchase it, This game requires to have VR headset that costs \$500-700. Yes this game does have steam cards, however it is lacking the turn VR option off. Pros The dev working on patching and making a VR game Concept is slightly original. Cons Toxic Fanbase VR Headset Glitches etc.. Perfect game. THATS MY GAME :). It doesn't work on any of my PCs.. Did it for the cards. The best part is when the game doesn't work properly. Well I only can find that part.
